and more

An experienced Full-Stack Developer with expertise in web and mobile development, automation, and scalable system design. Proficient in both front-end and back-end technologies, with a strong focus on building responsive, high-performance applications. Skilled in automation tools to streamline workflows and enhance efficiency. Committed to writing clean, maintainable code and following best practices. Additionally, possess strong communication and collaboration skills to drive projects effectively in a team environment.

JOB EXPERIENCE

Jan 2021 – Present

Full-Stack Developer | Automation Specialist

Codiqqa, Self-Employed

- Develop and maintain web and mobile applications using React, Next.js, and React Native, ensuring seamless and responsive user experiences.
- Build and optimize custom CMS platforms for internal and client use, enhancing content management efficiency.
- Engineer scalable backend solutions with Node.js, TypeScript, and Python (Django) to support high-performance applications.
- Design and implement GraphQL and REST APIs for efficient data exchange between frontend and backend services.
- Collaborate with cross-functional teams to create mobile-first solutions, driving user engagement and business growth.

Mar 2024 – Oct 2024

Web & Mobile Developer

Volv Ventures, Remote

- Leading the development of custom CMS platforms tailored for both internal and client use, ensuring seamless content management and user experience across web and mobile interfaces.
- Developing dynamic web and mobile applications using React/Next.js for web and React Native for mobile, delivering smooth and responsive experiences.
- Designing and implementing robust backend solutions with Python/Django, Node.js, and TypeScript, while ensuring smooth integration with frontend technologies.

Jun 2023 – Mar 2024

Full-stack Developer (Node.js & TypeScript)

Major League Profits, Remote

- Developed high-performance backend services using Node.js and TypeScript, enabling seamless functionality and improving the user experience for both web and mobile platforms.
- Led the design and implementation of API integrations that streamlined business processes, improving overall system efficiency and performance.
- Partnered with product teams to create mobile-first development strategies, focusing on building applications that are responsive and optimized for a variety of devices.

Oct 2022 – Apr 2023

Sales Operations & Web Development Manager

Flow Research Collective, Remote

- Built custom dashboards using Python/Django that enhanced visibility into sales metrics, empowering teams to make data-driven decisions that accelerated performance.
- Simplified sales workflows by integrating API tools that optimized efficiency and communication between sales and support teams.
- Oversaw the implementation of technical solutions that bridged the gap between sales growth and web development, ensuring all systems worked harmoniously to support company objectives.

Oct 2022 – Apr 2023

Web Developer

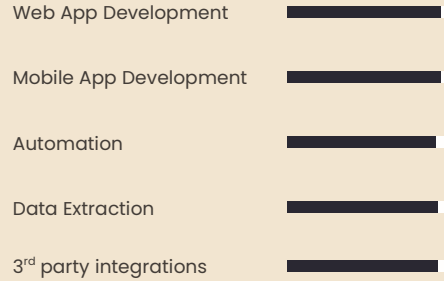

Blue Ocean Clicks, Remote

- Designed and developed responsive websites using React and Next.js, elevating user engagement and improving client satisfaction through intuitive, fast-loading platforms.
- Built custom web applications, including lead generation tools and CRM integrations, that streamlined clients' sales processes and boosted conversions.
- Managed full-cycle development of marketing strategies, including mobile-optimized websites and automated sales funnels, helping clients grow their businesses sustainably.
